Global Centre *for*
Capacity Building

2021

GCFORCB Organization is India's largest Public Health Capacity Building Organization and Public Health management platform for Professionals. It is the fastest-growing Virtual and Simulation based technology company that has pioneered the use of technology in all verticals of public health education, academic, administration, research and public health practice.

Over the years, we have worked hard to establish ourselves as a leader in the field of Public Health Capacity Building programs. We are always at the forefront of successful partnerships in the education space with both national and international Organisation endorsing its flagship 'Virtual Public Health Internship certification for Facilitators, HR Managers, Counselors and Public Health Students.

As the most comprehensive platform for Public Health Professionals, its only made sense for us to make this process more accessible to students globally. GCFORCB Org Products is the largest collection of Public Health student programs and Capacity Building solutions that is expanding as you read this.

Students and Professionals can explore different courses, tests, and solutions and subscribe to them for a brighter future. As a user of this platform, you will receive Virtual certification. It doesn't stop here because you can also plan for, and invest in the next few years of your career. Choose from a range of professional courses or find the perfect internship. GCFORCB Org products is a one-stop solution for all your Public Health guidance needs.

GCFORCB Organisation Welcome you to Virtual Public Health Internship Program (VPHIP) Batch.

About VPHIP

You will get an insight into the functioning of a both National and International NGO. You will learn about public health documentation and organization in India. You will get training by practicing of project management, grant writing, administration and financial management, personal development and more. This will be an enriching experience with the knowledge given by our mentor to create impact in the public health system as well as of the impressive work that is being done under various programs.

Virtual Public Health Internship provides students with a firsthand experience directly from industry experts who have been into roles involving grass-root as well as executive roles to give you an In-depth understanding. In the VPHI, industry leaders and experts give you an in-depth analysis of your chosen career by explaining you about the work involved as well as future prospects. Each VPHI has been designed after speaking to 20-30 industry experts from each career.

Who Can Apply for Internship?

- Applicants with graduate/post-graduate qualification in medical and allied fields with relevant work experience in public health with health related organizations /NGOs.
- Applicants currently engaged in public health related activities such as health professionals working with directorates of health services, central and state governments, officials engaged in health services at national, state and district level government institutions.
